UMAR AKHTAR

Aspiring AI/ML Researcher · Computer Science Graduate · Full-Stack Developer & Designer
Faisalabad, Pakistan | +92 342 6874805 | akhtarumar11223@gmail.com | LinkedIn | GitHub | Portfolio

HONORS AND ACHIEVEMENTS

- Completed the Aspire Leaders Program, Aspire Institute at Harvard University (2026 Cohort), building leadership, critical thinking, and communication skills.
- Selected as Instructor (Section Leader), Probability for AI (PAI), Stanford University, 2026.
- Judge, Arbiter Hacks V1, evaluating participant AI and software projects for technical quality, innovation, and impact.
- Mentor, Ericsson Sustainability Challenge (Hack for Earth), guiding teams in developing sustainability solutions (UAE).
- Mentor, Open Agent Hackathon (GenAI Works), answering technical and product questions for AI-agent teams (USA).
- Mentor, Opportunity Hack (OHack), supporting teams in building technology solutions (USA).
- Mentor, Oslo Sprint Hackathon, supporting participating teams with technical and project guidance (Norway).
- Mentor, Beyond Barriers Mentoring Scheme, Kingston University, mentoring students (UK).
- Participant: ICSC; Global Logic & Reasoning; Classic CCC international competitions.

EDUCATION

BS Computer Science at Government College University Faisalabad (GCUF), Pakistan *Sep 2022 to Jul 2026*

- CGPA: 3.39 / 4.00

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, PHP, SQL
- **AI/ML:** scikit-learn, TensorFlow, Keras, Prompt Engineering, LLM APIs (Gemini API, Fireworks AI), AI Agents & Workflow Automation, Multi-Agent Systems, AI Chatbot Integration, AI Recommendation Systems
- **Data Structures & Algorithms:** Actively practicing problem-solving on LeetCode
- **Web Development:** React.js, Node.js, Express.js, FastAPI, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
- **Databases & Tools:** MySQL, MongoDB, Git/GitHub, VS Code, XAMPP, Netlify, Hostinger
- **Design:** Figma, Canva, UI/UX Design, Graphic Design

PROFESSIONAL EXPERIENCE

AI Agent Developer (Intern) @ Barakah TechLabs *Oct 2026 (1-month program)*

- Completed an intensive project-based internship in AI & Workflow Automation, developing industry-aligned AI agent applications.

Software Developer (Web & AI/ML) @ WeblyPro (Digital Agency) *Sep 2023 to Present*

- Build websites and web applications for multiple concurrent client projects using React.js, Node.js, HTML, CSS, and JavaScript.
- Develop AI/ML solutions in Python for larger projects, including custom in-house AI systems and AI-powered features.
- Coordinate directly with clients and internal teams, acting as an intermediary between stakeholders.

UI/UX Designer @ Softnixt Solutions *Feb 2026 to Sep 2026*

- Designed trendy, modern website UI/UX in Figma, using AI tools and inspiration from leading websites.
- Designed the Softnixt company website and the Crelix website, plus the UI for Lightning Ads, an ads-handling website, and other client projects.
- Collaborated with cross-functional teams to plan, build, and maintain client web applications with responsive, cross-browser layouts.

Social Media Manager @ Future Career Hub *Oct 2024 to Dec 2025*

- Handled graphic design, web design, and video editing, and published content across Facebook, Instagram, YouTube, and WhatsApp.
- Managed the FCH creative team: assigned tasks, followed up on progress and deliverables (e.g. requesting reports and videos), and reviewed output.
- Supported student admission processing, including documentation and SOP/CV preparation.

KEY PROJECTS

MarketPulse AI (AMD Developer Hackathon – Act III) *(Python, FastAPI, LightGBM, LLM, Optimization)* **View project**

- Team-built AI market-intelligence and inventory decision system that turns sales data and local context (paydays, holidays, nearby schools/markets) into a budget-constrained purchasing plan for small retailers.
- Pipeline: quantile demand forecasting (LightGBM, hierarchical pooling, seasonal-naive), newsvendor optimization with integer budget allocation, MOQ and shelf-life constraints, and an LLM layer for multilingual profile extraction and plain-language explanations.
- LLM never computes figures: every number is grounded to optimizer output via JSON-pointer citations, with a guard that rejects ungrounded numbers. Supports 7 languages incl. Urdu, Hindi, and Arabic; FastAPI backend with web UI.

EduSense AI: Early Emotional Learning Assistant (AMD Developer Hackathon) *(Next.js, Fireworks AI)* **View project**

- Built a multimodal AI assistant that analyzes short classroom/home videos of children to surface emotional understanding, behaviour observations, and early risk indicators for parents and teachers.
- Implemented a video/vision/speech analysis pipeline with 13-category emotion scoring, personalized recommendations, progress-tracking dashboards, and downloadable PDF reports.

Engineering Studio AI *(Python, FastAPI, Fireworks AI, native.builder)* **View project**

- AI-powered multi-agent engineering design system that generates complete engineering packages (designs, code, schematics, compliance docs) from product briefs, using 11 specialized AI agents covering research, mechanical, electrical, firmware, simulation, cost, compliance, and quality review.
- Deployed on production cloud infrastructure with GitHub OAuth authentication and real-time CI/CD monitoring, cutting a process that typically takes engineering teams weeks down to minutes.

AI-Based Smart Fashion Recommendation System (Final Year Project) *(React, PHP, MySQL, Gemini API, LightX API)* **View project**

- Built an AI-powered fashion e-commerce platform with AI chatbot, visual product search, personalized recommendations, virtual try-on concept, loyalty system, and admin dashboard, spanning web and Android with a shared database.

CERTIFICATIONS

- CS50: Introduction to Programming with Python, Harvard University View certificate | Featured by Harvard Online
- Google AI Professional Certificate (7 courses), Google View certificate
- Experiment with Azure Machine Learning, Microsoft View certificate
- AWS Foundations of Prompt Engineering, AWS Training & Certification (Aug 2026) View certificate
- Use Machine Learning APIs on Google Cloud, Google Cloud (Skill Badge, Intermediate) View certificate
- Intro to Deep Learning, Kaggle View certificate
- Machine Learning for Healthcare, University of Aberdeen (FutureLearn) View certificate
- Python for Data Science, University of Leeds (FutureLearn) View certificate
- Deloitte Australia: Data Analytics Job Simulation, Deloitte (Forage) View certificate
