

UMAR AKHTAR

Aspiring AI/ML Researcher · Computer Science Graduate · Full-Stack Developer & Designer
Faisalabad, Pakistan | +92 342 6874805 | akhtarumar11223@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

BS Computer Science at **Government College University Faisalabad (GCUF), Pakistan** *Sep 2022 to Jul 2026*

- CGPA: 3.38 / 4.00
- Relevant coursework/focus: Artificial Intelligence, Machine Learning fundamentals, Data Structures & Algorithms, Databases, Software Engineering, Web Technologies

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, PHP, SQL
- AI/ML: Prompt Engineering, AI Chatbot Integration, AI Recommendation Systems, Gemini API, Fireworks AI
- Data Structures & Algorithms: Actively practicing problem-solving on LeetCode
- Web Development: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
- Databases & Tools: MySQL, MongoDB, Git/GitHub, VS Code, XAMPP, Netlify, Hostinger
- Design: Figma, Canva, UI/UX Design, Graphic Design
- Digital Marketing & Analytics: Meta Ads, TikTok Ads, Google Ads, Pixel/Conversion Tracking, SEO, Google Analytics

PROFESSIONAL EXPERIENCE

UI/UX & Graphics Designer at [Softnxt Solutions](#) *Feb 2026 to Present*

- Design and develop responsive, user-centered websites and interfaces using modern front-end technologies
- Collaborate with cross-functional teams to plan, build, and maintain client web applications
- Improve website performance, cross-browser compatibility, and mobile responsiveness across projects

Web Developer & Digital Designer at [WeblyPro \(Digital Agency\)](#) *Sep 2023 to Present*

- Develop and maintain responsive websites across multiple concurrent client projects, converting UI/UX designs into functional pages using HTML, CSS, JavaScript, and React.js
- Support Shopify development, SEO, and digital marketing workstreams as part of a full-service agency team
- Coordinate directly with clients and internal teams, often acting as an intermediary between stakeholders

Graphic Designer & Video Editor at [Future Career Hub](#) *Oct 2024 to Dec 2025*

- Produced posters, banners, and edited video content for study-abroad marketing campaigns
- Managed multi-platform social media publishing (Facebook, Instagram, YouTube, WhatsApp)
- Supported student admission processing, including documentation and SOP/CV preparation

KEY PROJECTS

AI-Based Smart Fashion Recommendation System (Final Year Project) *(React, PHP, MySQL, Gemini API, LightX API)* [View project](#)

- Built an AI-powered fashion e-commerce platform with AI chatbot, visual product search, personalized recommendations, virtual try-on concept, loyalty system, and admin dashboard, spanning web and Android with a shared database

EduSense AI: Early Emotional Learning Assistant *(AMD Developer Hackathon, Next.js, Fireworks AI)* [View project](#)

- Built a multimodal AI assistant that analyzes short classroom/home videos of children to surface emotional understanding, behaviour observations, and early risk indicators for parents and teachers
- Implemented video/vision/speech analysis pipeline with 13-category emotion scoring, personalized teacher/parent recommendations, progress-tracking dashboards, and downloadable PDF reports

Engineering Studio AI *(Python, FastAPI, Fireworks AI, native.builder)* [View project](#)

- AI-powered multi-agent engineering design system that generates complete engineering packages (designs, code, schematics, compliance docs) from product briefs, using 11 specialized AI agents covering research, mechanical, electrical, firmware, simulation, cost, compliance, and quality review

- Deployed on production cloud infrastructure with GitHub OAuth authentication and real-time CI/CD monitoring, cutting a process that typically takes engineering teams weeks down to minutes

Crelix AI (*AI marketing intelligence and ad-creative generation platform*) [View project](#)

- Contributed to an AI platform that analyzes a business's website, market, and competitors to automatically build a full ad campaign, including audience insights, hooks, ad copy, and platform-native creatives for Meta, Google, TikTok, and LinkedIn

LEADERSHIP & CONTINUOUS LEARNING

- Aspire Leaders Program, Aspire Institute at Harvard University (Currently participating): developing skills in leadership, professional development, and global collaboration [View enrollment email](#)
- iCodeGuru Community (Member): actively studying Python, Machine Learning, Deep Learning, Data Structures & Algorithms, and problem-solving (LeetCode)

CERTIFICATIONS

- CS50: Introduction to Programming with Python, Harvard University (CS50) [View certificate](#)
- AI for Content Creation, Google (Coursera) [View certificate](#)
- AI for Research and Insights, Google (Coursera) [View certificate](#)
- Getting Started with Artificial Intelligence, IBM SkillsBuild [View certificate](#)
- AWS Foundations of Prompt Engineering, AWS Training & Certification (Aug 2026) [View certificate](#)
- Machine Learning for Healthcare, University of Aberdeen (FutureLearn) [View certificate](#)
- Python for Data Science, University of Leeds (FutureLearn) [View certificate](#)
- AI for Beginners, HP LIFE (HP Foundation) [View certificate](#)
- UK Agent and Counsellor Training (British Council), Agent role [View certificate](#)
- International Computer Science Competition 2026, Participation Certificate [View certificate](#)

ACHIEVEMENTS

- Use Machine Learning APIs on Google Cloud, Google Cloud Skill Badge (Intermediate) [View badge](#)
- Intro to Deep Learning, Kaggle [View certificate](#)
- An Introduction to Artificial Intelligence, The Open University (OpenLearn), Statement of Participation [View statement](#)
- AMD Developer Hackathon: ACT II, Participant (Jul 2026) [View certificate](#)
- AI Factory (native.builder Hackathon), Participant (Aug 2026) [View certificate](#)
- micro1 Frontier Engineering Challenge 2026, Certificate of Participation [View certificate](#)

LANGUAGES

- English: Professional Working Proficiency
